

# "e-Wink"

By Blink, World Sync

Student Innovation

Problem Statement:

To decrease human efforts and  
without using complicated app accessing home  
devices in a new fashion

Team Name:

ULTRA TERMINUM

Team Leader:

KARTIK GONDALIYA

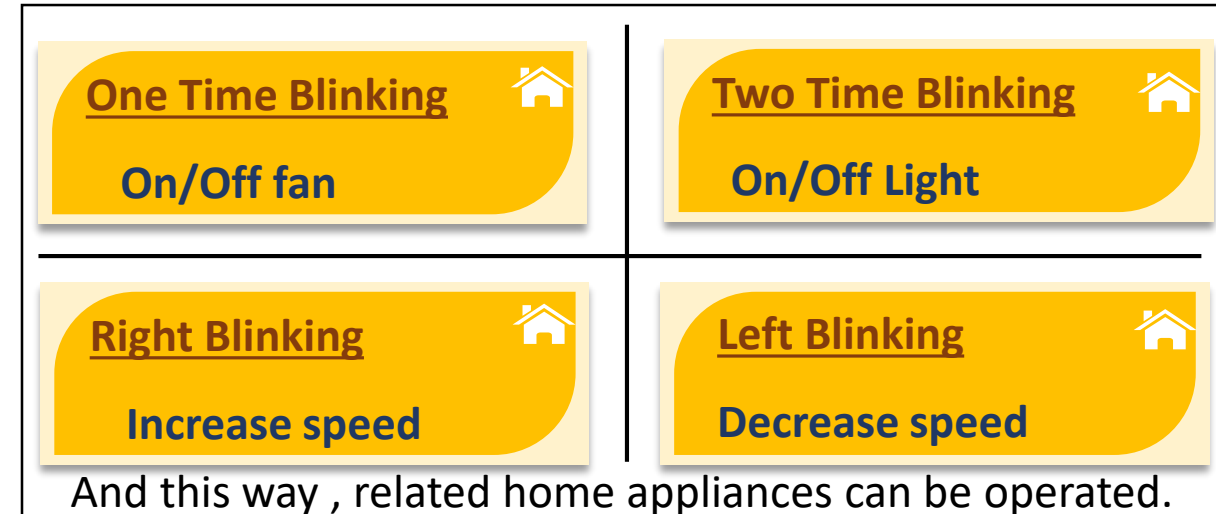

College Code:

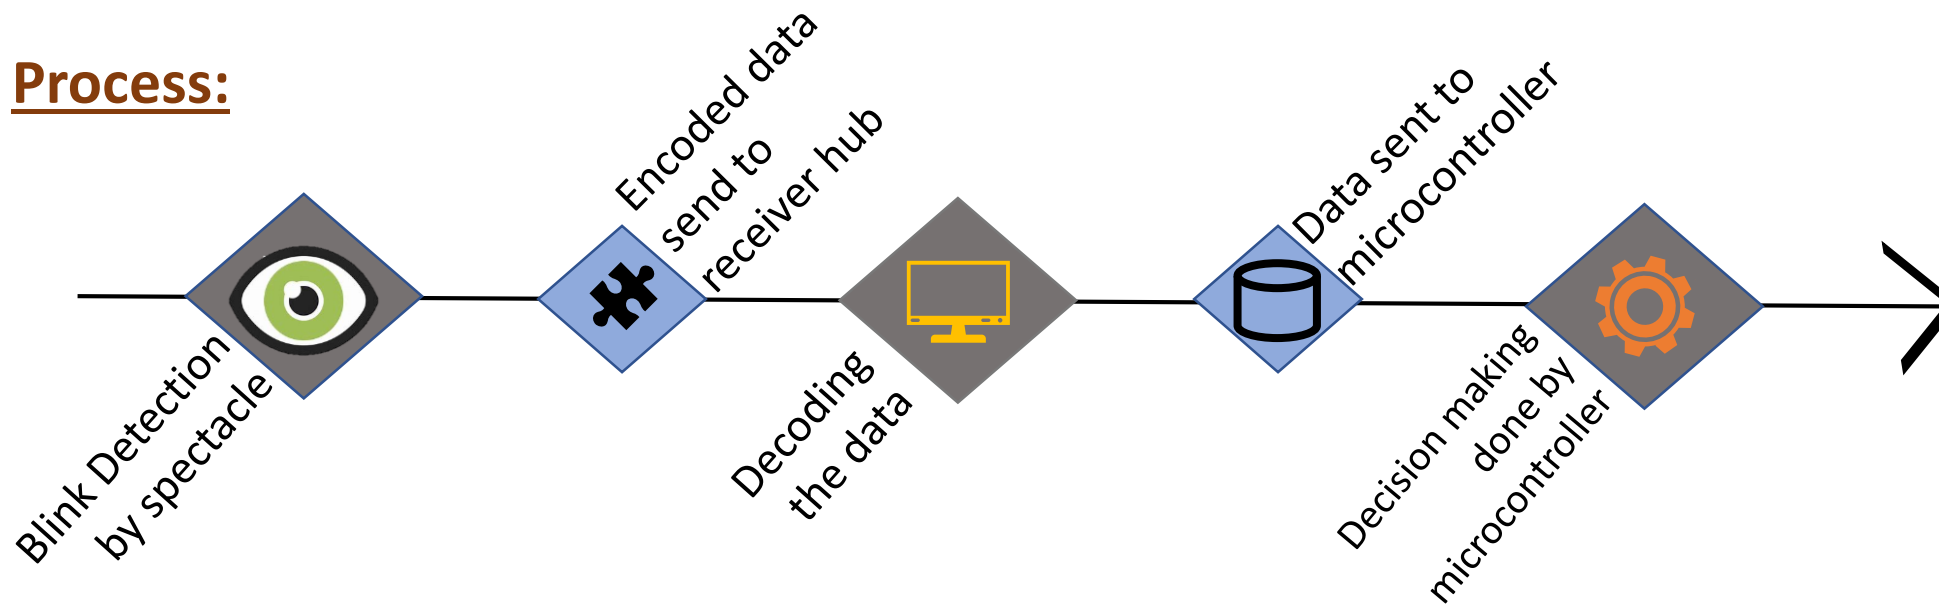

1-35159648293

## Idea Description:

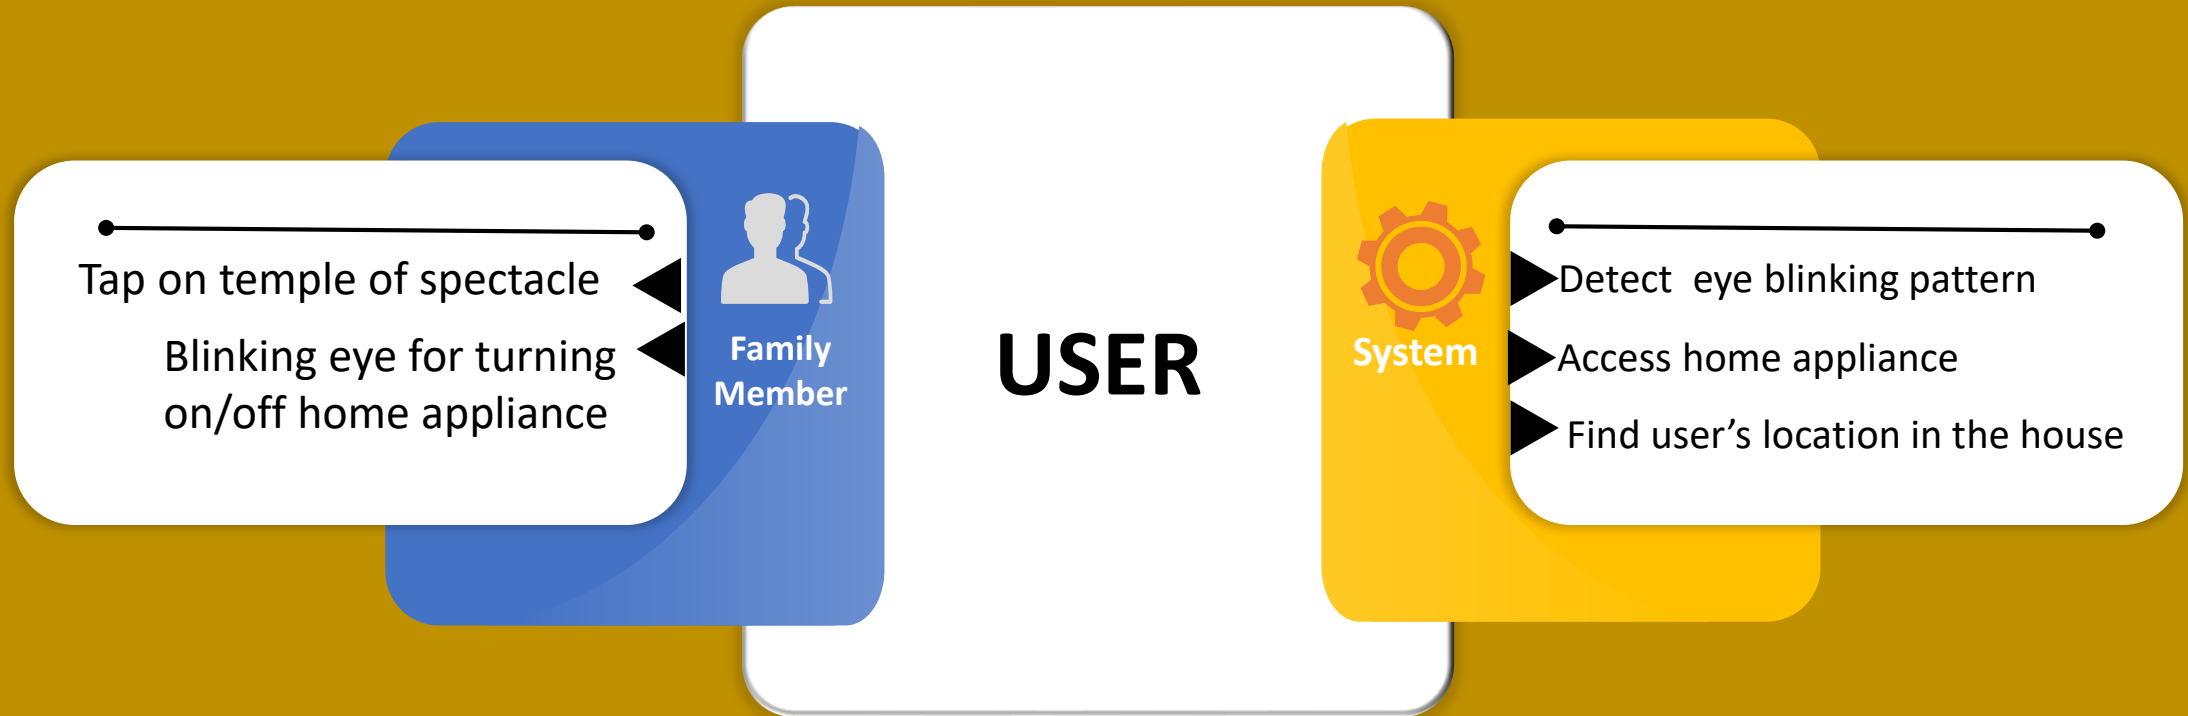

- We introduce a system called “**e-Wink**”, In which a person can wear spectacle and tap on temple and **blink his eye** according to **pattern** has been set earlier like shown in the figure.
- **Pattern setting** of eye blinking is user friendly.
- Our system automatically **detect the user** is in which room and **allow access** to this room’s all devices.

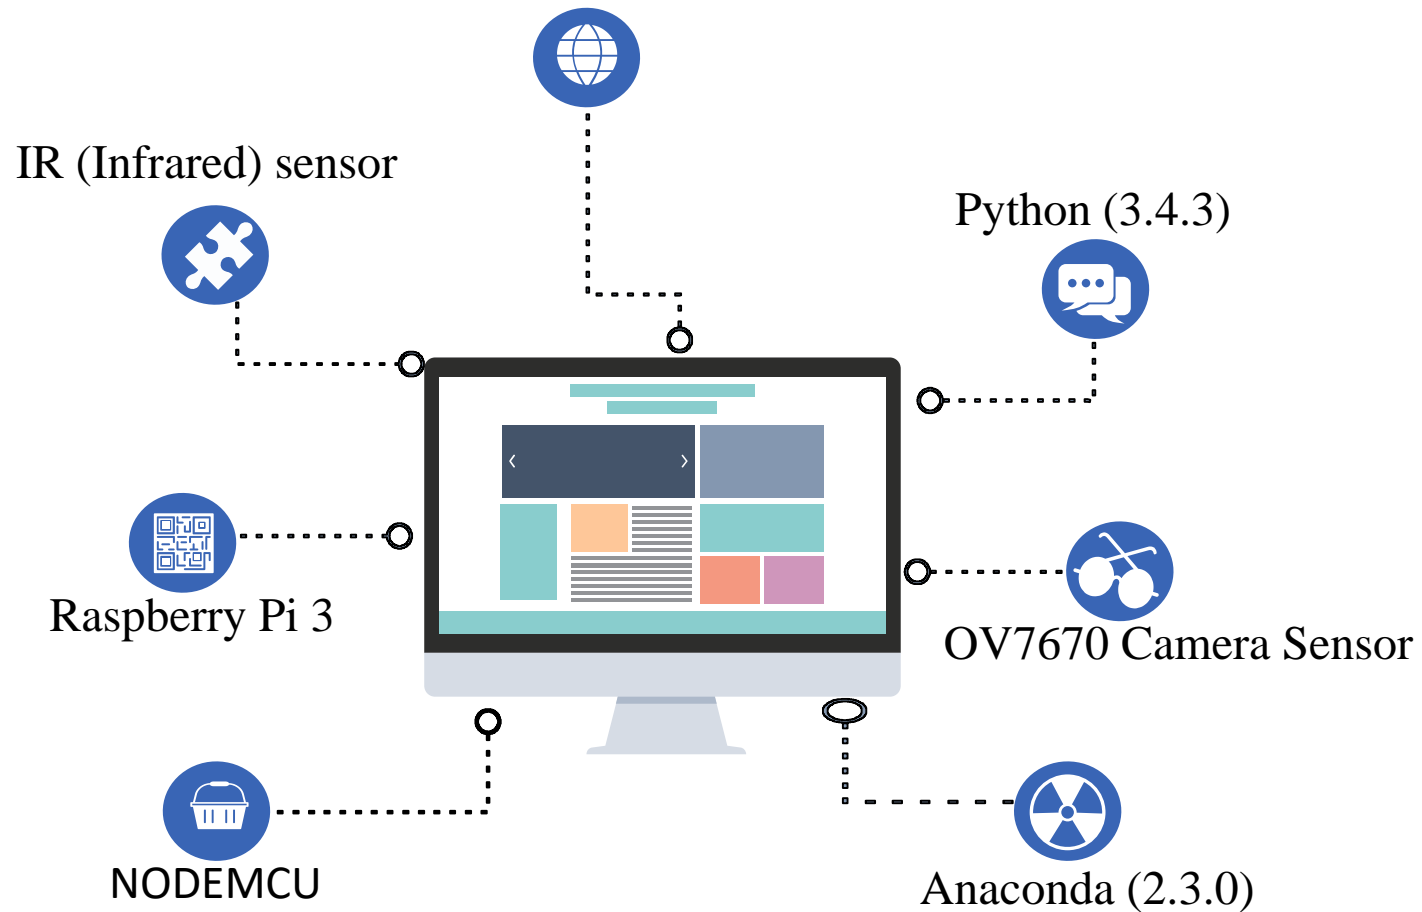

## Process:

## Users of the system:

## TECHNOLOGY STACK:

## DEPENDENCIES:

Home  
Appliance

Spectacle
